Convergent Satellite Billing

Convergent Satellite Billing

TheAIRTIME Unity Billing is not a system, it is a concept that delivers a 360 degree experience for operators as well as partners and end users.

We deliver the absolute most advanced and future proof satellite billing solution on the market today, a single platform that delivers real time rating of any services in the satellite business with cutting edge innovative solutions.

Real time rating of traffic data from basically any satellite network or internal services allowing advanced real time traffic monitoring capabilities as well as instant credit risk warnings.

Our Convergent Billing platform connects directly to multiple Inmarsat interfaces, Iridium, Thuraya, Globalstar, Intelsat, Stratos, Vizada, MVS, KVH, Viasat, AST, SingTel, Station711, Globecomm, Network Innovation, KDDI, Boeing, Honeywell, Satcom Direct, Aces and many more.

Mobilware systems have been used by many satellite operators on the market for more than 10 years and we have the ability to connect directly to all these operators in real time across provisioning as well as billing meaning no delay on any workflow or CDR processing, when we say Real time we mean Real time.

Dedicated to Satellite Billing

TheAIRTIME Unity Billing platform is a highly scalable and flexible setup that offers operators and satellite service providers the ability to perform Real time rating of any type of traffic CDRs as well as fees. Our platform is by default doing both operator rating and partner rating at the same time allowing partners directly to manage their rating in their own dedicated interface if needed.

Our platform enables 360 degree visibility, an offering that contains all needed information to run a succesful satellite business. Functionalities that operate seamlessly across provisioning, billing, monitoring, support, order management, prepaid management, inventory management, advanced self-care, includes a satellite shop and site management, basically a complete product offering that allows the operator and service providers a single platform that fullfills all their satellite business needs.

All offered functionality is based on Enterprise Java, redundant databases, in general the latest cutting edge internet standards with open REST API interfaces that allow fast integration to any external platforms like financial systems, POP, Firewalls...
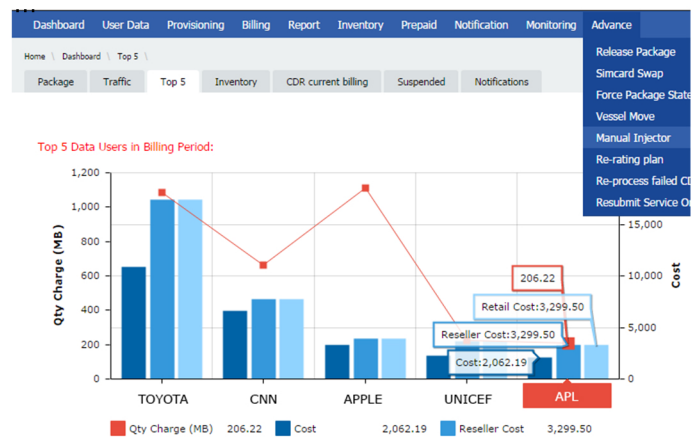

Customer Self-care

Any level of customers across reseller, partner, agent, company, subscriber, vessel, or airplane, have instant access to an easy to use self-care environment fully supporting responsive design across computers, tablets and smart phones. Any level can manage and view own data, view traffic data in real time, configure a wide range of monitoring, perform provisioning to the level allowed by the operator. One interface across Inmarsat, Iridium, Thuraya, Globalstar, AST, SingTel...

Collector, Mediator, Rating modules

Our Unity Collector will instantly collect traffic data across SFTP, FTP, SSH, file drop, web service interfaces, on the fly decrypt and intelligently manage need for archiving.

Collected traffic files will be mediated in one of the many standard mediation modules that we offer across Inmarsat formats, ASN1, TAP2, Sipexecs or any of the many operator specific formats.

Rating of mediated traffic data will be done based on rating plans, user data, dialing plans, event plans etc. Our rating module intelligently handles rating of fees, validation rules, manages bundle traffic across money bundle and data bundle

Bill, Rate, Invoice Anything

"Convergent" means our platform deals with any type of services; postpaid, prepaid, geo, money bundle, voice, data, streaming, messaging allowances, in bundle, out of bundle, group packages, combined post & prepaid offerings, forward billing, backward billing, crew call solutions, package hibernate rating and much more.

The integrated invoice handler manages diffrentiated invoice layouts, one invoice across any number of services, intelligent management of world wide VAT, special sales taxes, minimum invoice fees, credit card gateway integration to all major clearing interfaces.

Billing Environment that keeps Evolving

Mobilware Unity is constantly evolving into the future adding imporved workflow, new functions, you keep geting more and more functionality for the same low price.

Mobilware

We're a global strategic satellite firm.
We design product-service experiences, making business transformation happen.
